NOTES

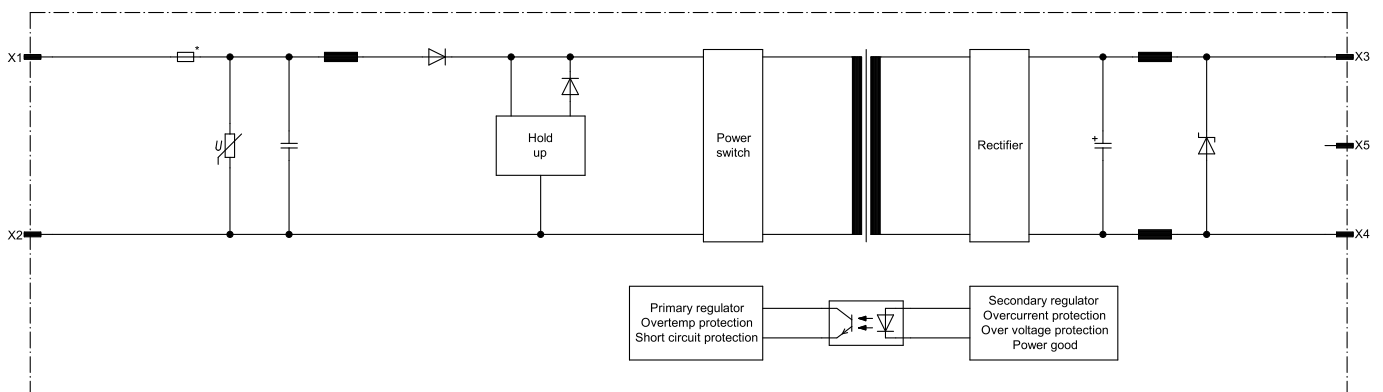

Installation instructions:

The converters have to be installed according to the guidelines currently in force, like other open electronic component assemblies. Attention must be paid to sufficient ventilation, carry off heat, fastening and protection against accidental contact. Fault protection: The converters are equipped with a soldered-in-time-lag fuse corresponding to IEC 60127-2 for input protection, except version 87 61 12 0052 7. In case at fault the supplying current source must be capable to blow the fuse.

Caution

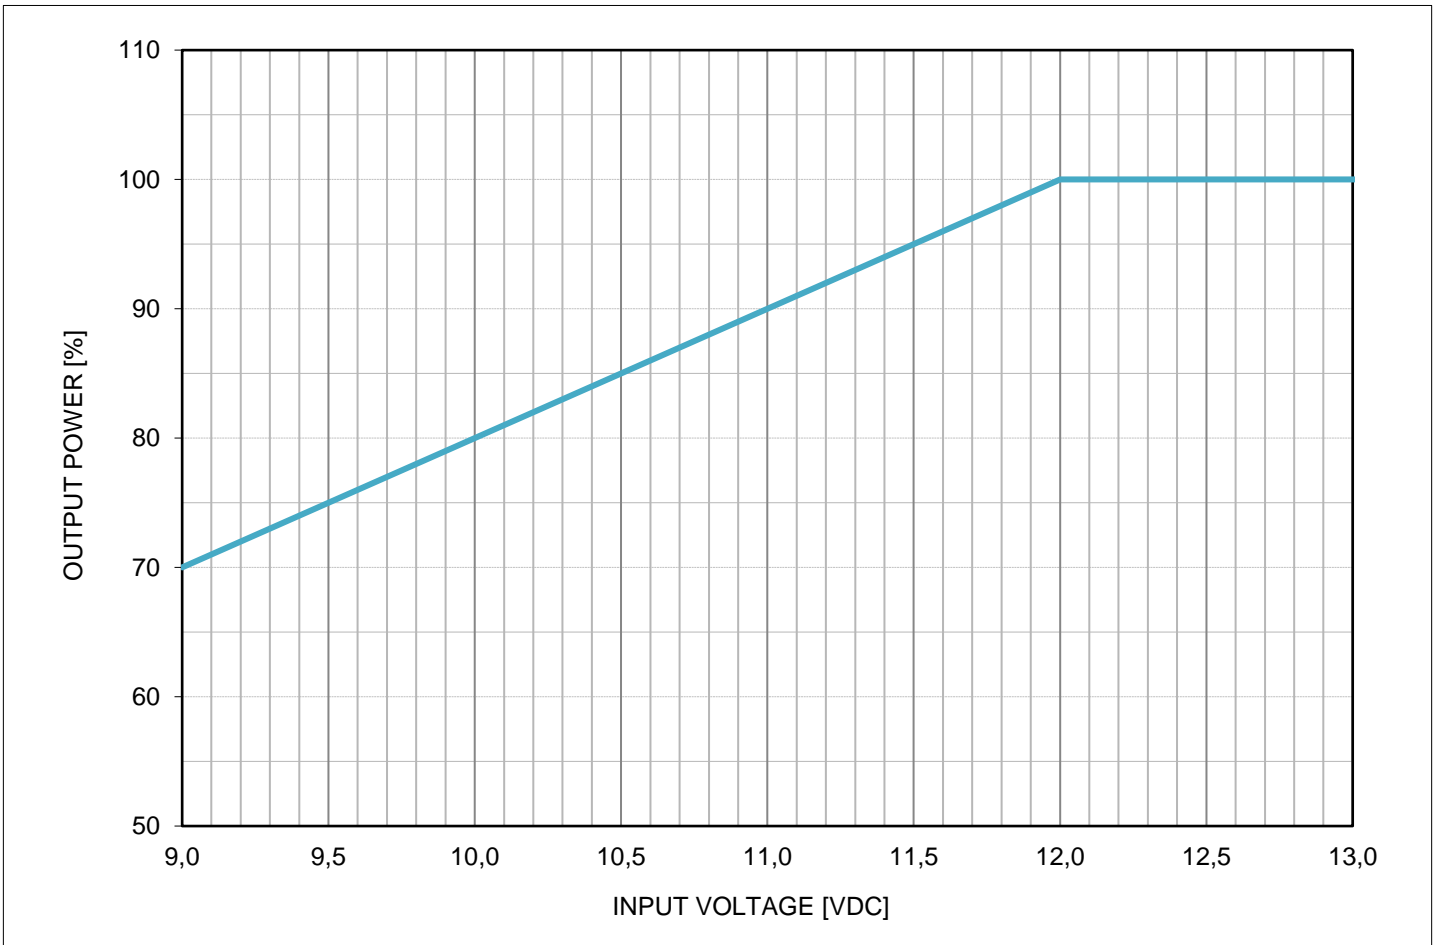

- No protection against touching, dangerous voltage
- After power off, wait 10 s before disconnecting or touching
